

Pur Cann

PHARMA

HEMP & CANNABIS PRODUCTS
THC | CBD | CBG | CBN | CBDA

WE BRING OUR PHARMA EXPERTISE TO THE CANNABIS MARKET

PurCann Pharma produces and markets cannabinoid-rich extracts from Canadian-grown hemp and cannabis. The purified and standardized extracts, rich in cannabinoids (THC, CBD, CBG, CBN, and CBDA), are sold in bulk or as finished products, such as oils, hashish, capsules, sprays, skin creams, gummies, etc.

PurCann Pharma boasts a multidisciplinary team of experts, several laboratories and a state-of-the-art extraction-purification plant.

PurCann Pharma also offers Toll and Contract manufacturing services, Private Label, R&D, extraction, purification, and packaging services. We hold the R&D license, the cannabis processing license, and the sales license from Health Canada. We also have a field sales team in every Canadian province.

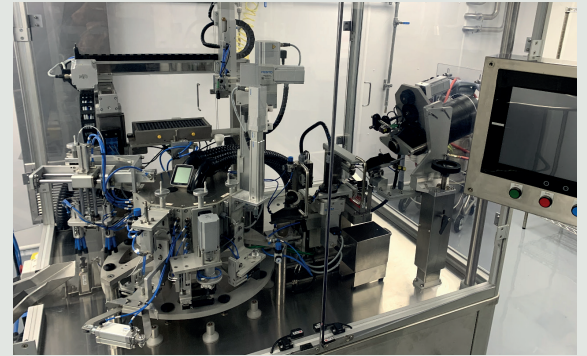

INDUSTRIAL PRODUCTION CAPACITY

PurCann Pharma has acquired the cannabis division of Neptune Wellness Solutions, including a 50,000 ft² plant located in Sherbrooke's Parc Technologique.

PurCann Pharma also benefits from facilities located on a 165,000 ft² site in the Parc Technologique in Quebec City. The state-of-the-art plant, built in 2009 and further expanded in 2019, now occupies more than 45,000 ft², including 9,000 ft² of laboratory space, for a total investment of \$45 million.

The site is ISO 9001:2015 certified, and we follow the Good Production Practices (GPP) of Health Canada's Cannabis Regulations. We are also working towards EU GMP certification.

The acquisition of the Sherbrooke site enables us to process several tonnes of biomass a week and produce thousands of bottles or atomizers a day.

SELECTED CANADIAN BIOMASS

PurCann Pharma has entered into agreements for the supply of hemp and cannabis with local growers, as well as with growers across Canada, to suit the market.

Growers must provide Certificates of Analysis (CoA) attesting that their products respect all Health Canada criteria regarding cannabinoid concentration, microbial counts, heavy metals levels, pesticides residues, etc.

To ensure that all biomasses are in total compliance with Health Canada's quality criteria, PurCann Pharma carries out random sample analysis on all newly delivered biomass.

BULK & READY-TO-SELL PRODUCTS

■ BULK EXTRACTS

High-quality, standardized hemp and cannabis oils and extracts in various grades:

- Full Spectrum,
- Distillate,
- Isolate.

■ FINISHED PRODUCTS

- Oils,
- Sprays,
- Softgels,
- Capsules,
- Skin creams,
- Gummies,
- Vape Cartridges,
- Hashish,
- Prerolls,
- Whole flowers.

ANALYSIS & QUALITY

PurCann Pharma has its own Quality Control (QC) and Quality Assurance (QA) team at the Sherbrooke site.

Our dedicated teams of 50 scientists, QA specialists and QC analysts guarantee high-purity, standardized products.
